Why We Choose Wilson & Company

Our organization has been in existence for 10 years. We started in our spare bedroom. Our business has grown and hence our need for "space" has changed. I am not very knowledgeable (or interested) when it comes to building codes, permits, and office requirements. When I began to look at different companies to construct our office building it was overwhelming. But after an initial search, I chose Wilson & Company. After reading their letters of reference, they sounded good on paper. I honestly wondered though, how anyone could be that well liked and respected.

After our building project has been completed I now understand why Wilson and Company has so many satisfied customers. They actually made the process enjoyable. No question ever went unanswered and no "change order" was out of the question. I especially enjoyed their field supervisor. Brock went beyond the call of duty over and over again. Wilson & Company has an ace in their pocket with Brock. He always was pleasant and willing to stop what he was doing to answer our question. He never seemed hurried and always was able to calm our nerves through any decision making process.

Parks Wilson (owner) is of the "old school". He actually is concerned about customer satisfaction! He was always willing to sit and talk and has a million stories about people relationships and projects. He is highly professional and knowledgeable and knows how the building industry system operates. He is a man well respected in the community. As a side note, Parks has a lot of character, integrity and faith. He lives his faith and knows how to "walk the talk".

Catholic HEART Workcamp highly recommends Wilson & Company. As I write this, we are in our building, all has been paid, and they are still showing up to finish anything that wasn't done perfect! They pay attention to details and it shows in our beautiful building. It was a very wise choice for us. I would imagine it would be for you as well.

Sincerely,
