

CONTROL TECHNOLOGIES

November 13, 2001

To whom it may concern,

**re: Control Technologies 14,000 sq ft steel & block construction**

It is very refreshing to write a letter of appreciation for a project superbly executed within the timeframe projected. Wilson & Company were recommended to me and following completion of my construction project I would not hesitate to recommend Parks Wilson and his team to any of their prospective clientele.

As a service provider, we certainly appreciate excellent customer service and being continually updated on progress. The site supervisor Mr. Mark Bay was meticulous in his attention to detail and always acknowledged the need for me to be aware of the progression throughout the entire project.

If I can provide any further information to potential customers of Wilson & Company, please do not hesitate to contact me.

Yours sincerely,

Michael R. Day  
President
