To whom it may concern:

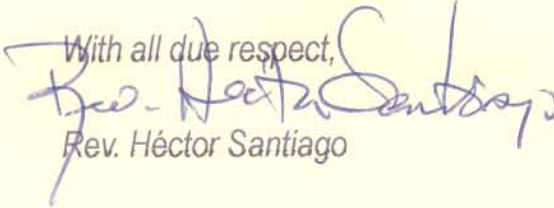

It is my purpose to share my experience having Mr. Broc Wagner as the person in charge of the construction of our church building.

First of all when Mr. Wagner came to our project, the building had to be torn down because of failures in the structural design. Mr. Wagner took charge of the supervision and the organization of the different crews that reinitiated the project. Our hopes were low, but Mr. Wagner showed us his skills, professionalism and to most of us he communicated every step that he was going to take in order to make things happen. I personally saw Mr. Wagner not only supervising but putting his hands to work physically and helping his crew so the church could be finished.

Mr. Wagner has the ability to supervise more than 40 to 60 people working at the same time. He is very organized and he also has the capacity to oversee problems and attack them before they arise. He is a problem solver and is respected by his character, personality and experience.

I strongly recommend Mr. Broc Wagner because he made it happen for us. He did not quit when others turned around. He follows what his company's beliefs, "100% client satisfaction". This is how our church members and I feel about this project and Mr. Broc Wagner's performance; **completely satisfied.**

With all due respect,

Rev. Héctor Santiago
