Re: Letter of thanks

Dear Wilson and Co:

I want to thank you for the professional manner in which you handled the construction of my office building at 255 Alexandria Blvd., Oviedo, FL. All of my concerns have been responded to in a timely manner. We are elated with the quality of construction of my office despite the fact that the entire project was finished under your proposed construction price and that included a number of changes added to the original plans such as the concrete work and the Mexican tiles at the entrance.

I appreciate Parkes Wilson for his persistence and determination on the permitting process with the City of Oviedo, which took many months and which he did without compensation. The actual construction process was completed within 2 weeks of what you had projected, which I appreciate as well.

Your whole staff was very personable and helpful also, especially Gene Burton who practically lived in my office for every day for 6 months and would work as early as 4 in the morning and on Sundays as well.

I think you make a good role model for the way the construction industry should be.

Sincerely yours,

Dr. Woody Dudley
