

Oviedo **VISION** Center

Dr. Gary D. McDonald • Dr. Jason R. Wallace
OPTOMETRIC PHYSICIANS

April 5, 2010

To whom it concerns:

Wilson and company built my building for me and we moved in July of 1998. The process was very easy due to the owner Parks Wilson staying on top of all that was needed. The schedule that was given to me initially was adhered to with very few delays.

I was also very impressed with the ideas and suggestions that were offered by Parks regarding different materials available for the particular item he was building, like different flooring that I had thought about, and each one had a cost savings with it. There was a supervisor assigned to my building, and he and Parks spoke every day, and a visit by Parks was done on site with me on a regular basis. Anything that needed a change was quickly rectified and done to my satisfaction.

I have had NO concerns about the structure or integrity of the building in 12 years, and everything still looks good, and works like it should. Any and all warranty work was completed in a timely manner.

Parks is a very talented, honest, and organized man capable of building anything, all while keeping the client informed and aware of what options are available.

I would definitely use Wilson and company again for any future projects.

Sincerely,

Gary McDonald, OD
