**Letter of Recommendation for Wilson & Company, Inc.**

We recently had the pleasure to work with Parks Wilson throughout all stages of construction of University Performing Arts Centre, a dance school located in Oviedo. Parks was truly an exceptional performer all along the way, as he was effective in managing his resources in order to complete the building by our opening date.

During the design phase, Parks' sincere caring and patience were evident as we spent many months working with him prior to signing a contract. He took the time that was necessary up front, making sure we were specifying what we really wanted. We never felt he was sacrificing quality at any time.

The construction phased lasted 6 months. It was an incredible achievement given the complexity of the project and the deadline. Parks' endurance clearly shined as we were presented with several challenges along the way. His closeness with his subcontractors proved invaluable when requiring their immediate attention. His masterful way with working with the City of Oviedo cannot be overstated. He was always available and made us feel like we were sincerely his number one priority. As our opening date was quickly approaching, Parks was able to persuade a state elevator inspector to perform a final inspection on a Saturday - something that is unheard of in this industry! The word "impossible" does not exist in Parks' vocabulary and we are truly grateful to him that we were able to conduct class in our new facility by our opening date.

Parks' professionalism and follow-through purely stands out in the construction industry. He is an overachiever and really goes that extra distance for his clients. Prior to our opening day, he spent several hours of his own time assisting us move equipment from our old location. We highly recommend him if you are contemplating building. He is strong financially and has an excellent relationship with his subcontractors. You can be assured that what you want is what you get when building with Parks Wilson. He is the best!

Sincerely,

  
Kevin Siegfried  
Vice President
